HIS MAJESTY KING GEORGE III.
IN PURSUANCE OF AN ADDRESS OF
THE HOUSE OF COMMONS OF GREAT BRITAIN.

ADDRESS

OF THE

House of Commons of Great Britain

TO

HIS MAJESTY.

EXTRACTED FROM THE VOTES,
Veneris, 11° *die Julii*, *Anno* 40° *Georgii* 3° *Regis*, 1800.

Most Gracious Sovereign,

WE, Your Majesty's moft dutiful and loyal Subjects, the Commons of Great Britain in Parliament affembled, having taken into our Confideration the State of the Public Records of this Kingdom, and the Neceffity of providing for the better Arrangement, Prefervation, and more convenient Ufe of the fame, humbly beg leave to lay before Your Majefty the Report of our Proceedings thereon; and to reprefent to Your Majefty, that in feveral of the Principal Offices we have found the Public Records preferved with great Order and Regularity, and in fome few, with a Method and Care which are exemplary; but that, in many of the moft important Offices, they are wholly unarranged, *undefcribed*, and unafcertained; that fome of them are *expofed to Erafure*, *Alteration*, and Embezzlement, and others are lodged in Places where they are daily perifhing by Damp, or incurring a continual Rifk of Deftruction by Fire.

A Period of nearly Seventy Years has elapfed fince the laft General Parliamentary Inquiry upon this Subject; and, during this Interval of Time, the Change which has taken place in the Language and written Character of Judicial Proceedings, as well as the large Accumulation of Materials which has been progreffively fuperadded in every Department, have increafed the Difficulties of methodizing the feveral Repofitories, or applying their Contents to Purpofes of practical Ufe.

In the Courfe of our Inquiry we have found that many of the Public Buildings allotted to thefe Ufes, and efpecially thofe Buildings which belong to Your Majefty's Exchequer in all its Branches, comprehending the ancient Records and Muniments of the Rights and Poffeffions of the Crown, and the Vouchers and Accounts of the Public Revenues and Expenditure, are in a State fo incommodious and infecure, as to require immediate Attention.

It has alfo appeared to us, that the falutary Meafures heretofore adopted by Your Majefty's Authority, for methodizing the Contents of fome of the principal Repofitories of Your Majefty's Records and Papers of State, might alfo be extended to many other Repofitories, with Confequences highly beneficial to the Public Service.

And the fame Motives which encouraged our Predeceffors to intreat Your Majefty's Directions for printing the ancient Records of Domefday, and the Rolls of Parliament, have alfo

alſo induced us to ſubmit to Your Majeſty's Wiſdom, our Deſire of extending the ſame Meaſure to other ancient and valuable Monuments of our Hiſtory, Laws, and Government.

Your faithful Commons do therefore moſt humbly beſeech Your Majeſty, that You will be graciouſly pleaſed to give ſuch Directions as Your Majeſty, in Your great Wiſdom, ſhall think fit, for the better Preſervation, Arrangement, and more convenient Uſe of the Public Records of this Kingdom.

And we beg leave further to aſſure Your Majeſty, that whatever extraordinary Expenſes may be incurred by the Directions which Your Majeſty, in Your great Wiſdom, ſhall think fit to give on this Occaſion, ſhall be chearfully provided for and made good by Your faithful Commons.

Jovis, 17° die Julii;

Anno 40° Georgii 3^tii Regis, 1800.

Mr. Chancellor of the Exchequer reported to the Houſe, That their Addreſs of Friday laſt (that His Majeſty would be graciouſly pleaſed to give ſuch Directions as He ſhall think fit, for the better Preſervation, Arrangement, and more convenient Uſe of the Public Records of this Kingdom; and to aſſure His Majeſty, that whatever extraordinary Expenſes may be incurred by the Directions which His Majeſty ſhall think fit to give on this Occaſion, ſhall be made good by His faithful Commons) had been preſented to His Majeſty; and that His Majeſty had commanded him to acquaint this Houſe, that He will give Directions as deſired by the ſaid Addreſs.

COMMISSION

ORDER.

At a Board of the Commiffioners appointed by His Majefty for carrying into Execution the Meafures recommended by the Houfe of Commons refpecting the Public Records of the Kingdom, &c.

Holden at the Houfe of the Right Honourable The Speaker of the Houfe of Commons, on the 14th Day of December 1804:

PRESENT,

The Right Honourable Charles Abbot, Speaker of the House of Commons,
The Right Honourable Lord Frederick Campbell,
The Right Honourable Sylvester Lord Glenbervie,
The Right Honourable Sir William Grant, Mafter of the Rolls:

Ordered, That the Record intituled Nonarum Inquifitiones, be forthwith tranfcribed and printed.

John Topham, Secretary.

THE Origin of the Records now published, the Authority by which they were taken, and the Manner of taking them, appear in the Statutes of the 14 and 15 Edw. III. and in the Commissions, and other Records in the Exchequer; from thence the following Statement has been collected.

At the Parliament holden at Westminster the Wednesday next after Mid-Lent, in the Fourteenth Year of the Reign of Our Lord King Edward the Third of England, and the First Year of His Reign in France, Stat. 1. c. 20. the following Grant was made of a Subsidy of the Ninth and Fifteenth: "And for the Grants Releases and Pardons of the said Chattels of "Felons and Fugitives, and many other Things underwritten which the King hath granted "to the Prelates, Earls, Barons, and all the Commons of his Realme for the Ease of them "perpetually to endure, the said Prelates, Earls, Barons, and all the Commons of the "Realme, willingly of one Assent and good Will, having regard to the Will that the "King their leige Lord hath towards them and to the great Travailes that he hath made and "sustained, as well in his Wars of Scotland, as against the Parts of France, and other "Places, and to the good Will which he hath to travail to keep his Realm, and maintain "his Wars, and to purchase his Rights: they have granted to him the Ninth Lamb, "the Ninth Fleece, and the Ninth Sheaf, to be taken by Two Years then next to come. "And of Cities and Boroughs the very Ninth Part of all their Goods and Chattels, to be "taken and levied by lawful and reasonable Tax by the same Two Years, in Aid of the "good keeping of this Realm, as well by Land as by Sea, and of his Wars, as well against "the Parts of Scotland, the Parts of France, Gascoyne, and elsewhere. And in Right "of Merchants Foreign, which dwell not in the Cities nor Boroughs, and also of "other People that dwell in Forests and Wastes, and all other that live not of their "Gain nor Store, by the good Advice of them which shall be deputed Taxers, shall be set "lawfully at the Value to the Fifteen without being unreasonably charged. And it is "not the Intent of the King, nor of other great Men, nor the Commons, that by this Grant "made to the King of Fifteens, the poor boraile People, nor other that live of their "bodily Travaile shall be comprized within the Tax of the said Fifteens, but shall be "discharged by the Advice of them which be deputed Taxers, and of the great Men which "be deputed Surveyors."

By Statute 2. in the same Year, the King willed and granted to the said Prelates, Earls, Barons, and Commons, Citizens, Burgesses, and Merchants that the aforesaid Grant should not another Time be had in Example, nor fall to their Prejudice in Time to come, nor that they be from henceforth charged or grieved to make any Aid, or to sustain Charge, if it be not by the common assent of the Prelates, Earls, Barons, and other great Men, and Commons of Our said Realm of England, and that in the Parliament; and that all the Profits arising of the said Aid, shall be put and spent upon the Maintenance and Safeguard of Our said Realm of England, and of Our Wars of Scotland, France, and Gascoigne, and in no Places elsewhere during the said Wars.

By a Third Statute in the Fifteenth Year of Edward the Third certain Conditions were expressed, whereupon the Subsidy granted in the Fourteenth were given.

Assessors and Venditors were thereupon appointed for every County in England to assess and sell the Ninth and Fifteenth, and Three Commissions were issued directed to Assessors and Venditors named under the Great Seal by the King and Council.

The Execution of the FIRST COMMISSION was confined to a few Parishes only within a County, and within the Assessment and Sale the Ninth of the Religious was included.

A SECOND

A Second Commission was afterwards issued by the same Authority, and directed (with a few Exceptions) to the same Persons, and this was also imperfectly executed; but it was done in a Way different from the First, by assessing and selling the Ninth of the Articles to be levied according to the Tax or Valuation of Churches completed in 1292, 20 Ed. I. called Pope Nicholas's Taxation. By which Proceeding it seems, that the Assessors and Venditors were to consider the Ninth of Corn Wool and Lambs in 1340 worth as much in a Parish, as the Tenth of Corn Wool and Lambs, and all other tytheable Commodities, and the Glebe Lands were, when the Valuation was made of them in 1292; and within the Assessment and Sale by virtue of the Second Commission the Ninth of the Religious was included.

In the Fourteenth Year of the Reign of Edw. III. the Clergy both of the Provinces of Canterbury and York granted to the King a Tenth for Two Years (besides the former triennial and annual Grants) of all their Property; and within this Grant was intended and included the Spiritualties and Temporalties of Abbies, Priories, and other Religious Houses, and Bodies. All the Property within the Valuation and Tax of 1292, in the Twentieth Ed. I. was subjected to the Tenth, in this Year granted for Two Years, and was afterwards collected agreeable to the Tax Book, or Valor Beneficiorum, now in the Custody of the King's Remembrancer.

Notwithstanding this Grant of a Tenth by the Clergy and Religious, they were assessed and taxed to the Ninth, and both were collected; this Exaction produced from Stratford the Archbishop of Canterbury, a Remonstrance addressed to King Edward, who afterwards (whenever the Grievance was stated) issued a Writ directed to his Treasurer and Barons of the Exchequer, and therein commanded Redress to be given.

From a Review of the Rolls of Parliament, Statutes, Register Books of Monasteries, and Priories, Writs of King Edward III. directed and sent to his Treasurer and Barons of the Exchequer, and other Proceedings of Record in the Court of Exchequer, in the Fifteenth, Sixteenth, and subsequent Years of the Reign of Edward III., it is evident, that from the Laity only the Grant of the Ninth and Fifteenth was considered to proceed, and that from the Religious the Ninth was not to be collected, except from those who held by Barony, and were summoned to Parliament when the Grant of the Ninth was made, and except also upon Possessions acquired by the Religious after the Twentieth Edw. I. which otherwise would wholly escape Taxation, not being included within the Valuation then made and called as already mentioned Pope Nicholas's Valor, which then, and till the Reign of Henry VIII. was used as the Guide for taxing the Clergy, and other Religious Bodies and Men, and was constantly resorted to by the Treasurer and Barons to correct the Accounts of Collectors of a Tenth, and to determine the Liability of Persons and Property, and to what Amount.

A Third Commission was afterwards issued and directed to the Assessors and Venditors on the Twenty-sixth of January, in the Fifteenth Year of the Reign of Edw. III. whereby they were instructed to levy the Ninth of Corn Wool and Lambs in every Parish, according to the Value upon which Churches were taxed (this means Pope Nicholas's Valor and Taxation) if the Value of the Ninth amounted to as much as the Tax, and to levy more where the true Value of the Ninth should be found to exceed the Tax; but should the Value of the Ninth be less than the Tax they were directed to levy only the true Value of the Ninth and to disregard the Tax; and to gain correct Information of these Facts, they were directed to take Inquisitions (the Records now published) upon the Oath of the Parishioners in every Parish.

In these Records it appears that the Parishioners of every Parish found upon their Oath the true Value (sometimes separately) of the Ninth of Corn Wool and Lambs, then the Amount of the antient Tax of the Church was stated, and afterwards the Causes of the Ninth not amounting to the Tax or Value of the Church were assigned, and when the Ninth did not exceed the Tax, it was assigned for Cause thereof, that within the Valuation or Tax of the Church there were other Articles included besides Corn Wool and Lambs, such as the Dos or Glebe of the Church, Tythe of Hay, and other Tythes. And if any Abbey, Priory, or other Religious Corporation, had Property within any Parish, the Ninth arising from such Property was found and returned.

There

There were in some Counties and Parishes local Causes which reduced the Ninth very much in the Fourteenth Edw. III. many Parishes in the Northern Counties were at the Time exposed to an invading Enemy, and totally or nearly laid waste; this Kingdom being then at War with Scotland. The Sea also had been destructive to other Parishes between the Twentieth Edw. I. and the Fourteenth Edw. III., and in consequence Land, which produced Corn when the Value and Tax of Pope Nicholas was taken, was either lost or uncultivated in the Fourteenth Edw. III. In the Counties much exposed to the Severity of a cold Winter (particularly Bedfordshire) Parishes were said to have suffered in the Fourteenth Edw. III. by the Death of Sheep and Lambs. In Buckinghamshire, the Mildew in many Parishes deteriorated and diminished the Produce and Price of Corn; the Poverty of the Parishioners and Inhabitants in many Parishes was mentioned as a Cause for much Land being uncultivated and unproductive; there were other Causes assigned, and all for the Purpose of shewing the great Difference between the Ninth in 1340, and the Value and Tax in 1292.

By the Nonæ Rolls it appears, that the Ninth was first attempted to be sold for more than the Tax of the Churches, then for as much as the Tax, and afterwards for the real and true Value, whether more or less than the antient Tax.

The Survey called Domesday, taken in the Reign of the Conqueror, and the Valor of Pope Nicholas, were copied into Books, the former probably, and the latter certainly, was compiled from particular Returns; some of those from which Pope Nicholas's Valor was compiled being now in the Custody of the King's Remembrancer in the Exchequer. In like Manner some of the original Inquisitions from whence the Nonæ Rolls were formed, and the Inrolments themselves, are now in the Exchequer, though they do not appear to have been transcribed into Books; and it is to be observed, that neither the Book of Pope Nicholas's Valor, nor the Nonæ Rolls are so ample in many Instances, as the particular Returns from whence they were respectively formed.

In the Reign of Charles the First, during the Usurpation of Oliver Cromwell, and in the Reign of Charles the Second, several of these Inquisitions, and Extracts, (containing the Whole of one or more Pariſhes) from the Nonæ Rolls, were at the Instance of Persons (as well Laity as Clergy) exemplified under the Seal of the Exchequer, and are inrolled amongst the Memoranda; ex' gr'
